Descripción

EN

2012 Honda BF2.3 short shaft tiller steer outboard just in at Morgan Marine in good running order. This engine is lightweight, easily transportable and ideal for small boats, dinghies and canoes. And quite frankly, it is the engine that anyone can operate with no problem. The BF2.3 is the smallest engine equipped with a neutral point on the market making it easy to stop the boat without having to kill the engine. Using the throttle grip, you can precisely adjust the engagement of the forward gear, giving you an accurate piloting touch. This comes in very handy when moving in and out of tight spots. Run up and checked over by us, this engine is ready to use!
